

Safety Screens

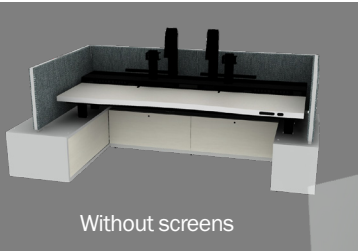

Mercury safety screen shown in clear acrylic.

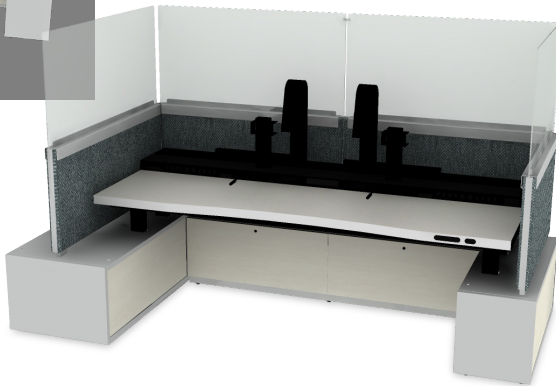

Safeguard the health of your team.

Make sure your team has the protection they need by retrofitting your consoles with acrylic screens that meet OSHA guidelines.

Providing partitions protects individual health, increases a sense of security, and ensures the productivity of your center. These screens are quick to install, easily sanitized, and are simple to remove and store when positions are not in use.

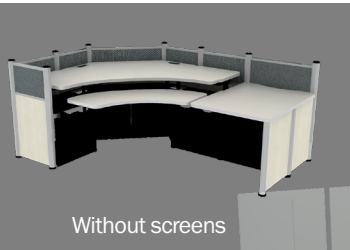

Without screens

For Mercury

Clamp-on screens for Mercury are available in heights of 12" and 24", with lengths from 39" to 96".

Without screens

For Synergy

Mount screens to Synergy in heights of 12" and 24", with lengths from 16" to 48".

Free standing

Free standing screens can help increase the safe footprint of any work area. Shown here on a Mercury tech cabinet, they can also be placed on worksurfaces to create partitions between team members, in private offices, or in reception areas to create a barrier between staff and guests. The steel base requires no mounting to the surface and is available in heights of 17", 21" and 25", with lengths from 18"-50". All heights pass the BIFMA tip test.
