

Watson Storage

Efficient. Secure. Smart

watsonconsoles

Stacking Personal Storage

Build depth between dispatch positions with stacking storage. Combine open, door, and drawers to create a multi-functional area for each telecommunicator.

Stacking Storage can be incorporated either on top of Base Stackers or Technology Cabinets.

Pallet Stackers are a great alternative for lighter storage needs, and a perfect location for policy guides.

Base Storage can be shared between positions or assigned individually.

Aisle-side Storage

No inch of a center is wasted when you incorporate aisle-side storage. Build up from the hubs of your console with shared open and door units for supplies and files, and disperse recycling centers by incorporating several throughout the center.

Keep trash and recycling away from workstations and out of sight with recycle centers.

Personal Lockers

Making room for storage is easy. Combine functionality by adding a personal mail slot to team lockers as a space-saving technique. Create small groups of lockers or group together in a traditional style. Available in multiple styles, sizes and colors.

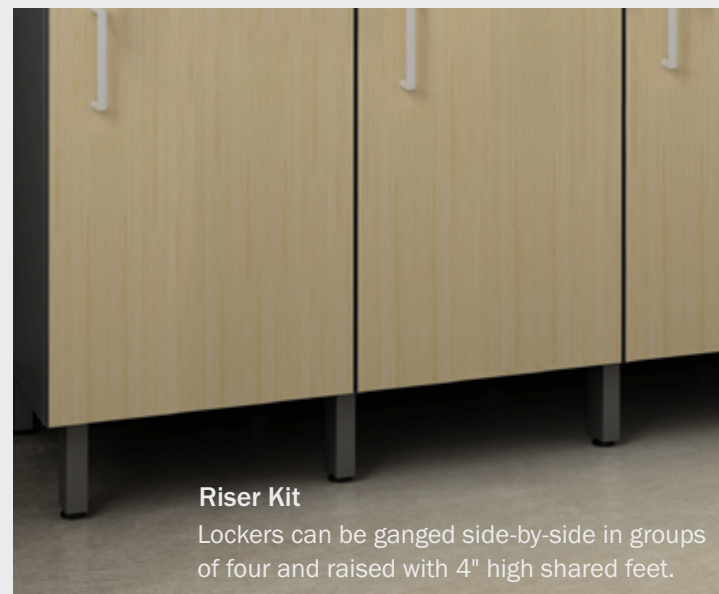

Lockers come standard with name plate frame (not shown)

Each compartment is keyed separately. Optional digital combination lock available

Lockers ship with hardware to gang together side-by-side

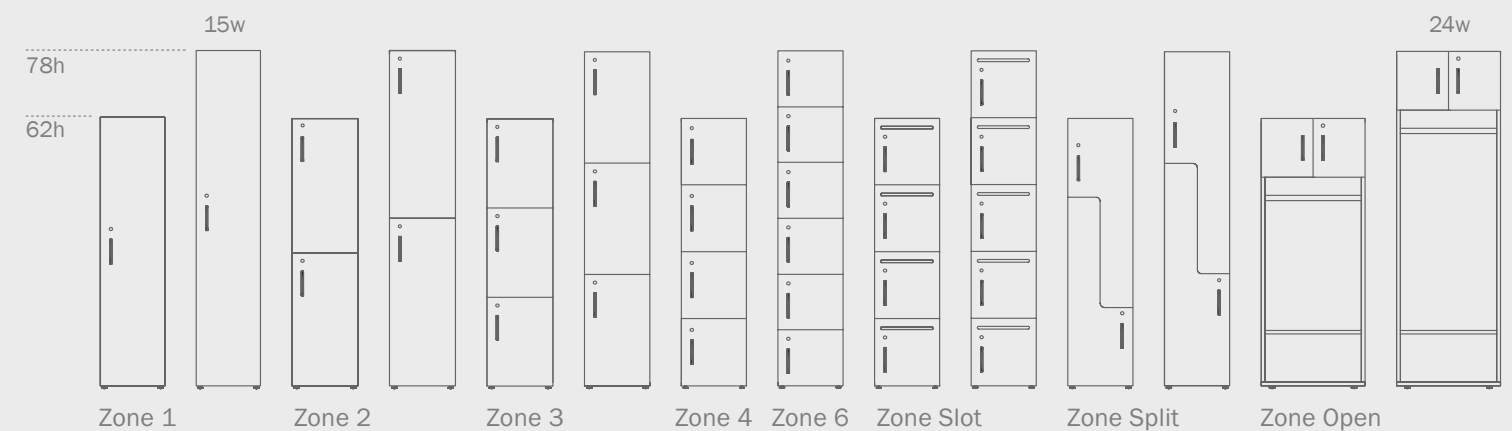

Doors may be hinged left or right

Riser Kit

Lockers can be ganged side-by-side in groups of four and raised with 4" high shared feet.

Everything at hand

Keep document binders, warrants and files accessible and close to hand with lateral storage.

Work Islands

A multi-functional addition to any control room. Incorporate the components that work for the needs of your team, from lockers to recycle centers. Add casters to create flexible mobile team storage.

Get Organized.

A place for everything, and everything in its place.
