Practical Performance + Smart Design

Built for high focus, 24/7 task-intensive environments and backed by the industry's strongest standard warranty, Mercury Standard is an ideal solution for any application, from call-taker and back-up dispatch positions, to security and network ops and utilities monitoring.

Tackable privacy screens create functional privacy. Acrylic upper section controls sound but preserves sightlines.

Slat rail monitor system provides for a variety of user created configurations. Monitor system provides height and focal depth adjustability.

Stackable storage assists in organization, with no wasted space.

Steel lifting columns provide up to 26" surface height adjustment and have a capacity of 535 lbs.

Hub cabinets allow for dedicated power and data entry points as well as cable management.

Outboard Technology Cabinets with axial fans to provide active cooling extend technology life and allow for easy IT access.

Cable Management:

An adjustable worksurface requires superior cable management. Watson's energy chains are high capacity, simple to use, and keep everything organized and convenient.

Designed to Scale:

Efficient use of space with side-by-side and back-to-back planning suits small spaces and large teams.

Functional. Durable. Flexible.

Functional: Mercury Standard provides operators, IT technicians and facility managers benefits that boost performance efficiency for public safety and operations control teams.

Durable: Mercury Standard exceeds standards across the board—in fire safety, BIFMA durability, R-56 compliance, FCC, ASTM E84, and CA TB 117. Watson's use of industry-best materials, expert machining and rigorous quality assurance ensure that your console will serve your team for more than a decade.

Flexible: Not only is Mercury's in-line design a space-saver, the true modular build means technology and personal storage components can be moved and added as technology and staffing changes.
