Watson Storage

Efficient. Secure. Smart.

Stacking Personal Storage

Build depth between dispatch positions with stacking storage. Combine open, door, and drawers to create a multi-functional area for each dispatcher.

Stacking Storage can be incorporated either on top of Base Stackers or Technology Cabinets

Pallet Stackers are a great alternative for lighter storage needs, and a perfect location for policy guides.

Base Storage can be shared between positions or assigned individually.

Aisle-side Storage

No inch of a center is wasted when you incorporate aisle-side storage. Build up from the hubs with shared open and door units for supplies and files, and disperse recycling centers by incorporating several throughout the center.

Keep trash and recycling away from workstations and out of sight.

Personal Gear Lockers

Available in multiple styles, sizes and finishes. Making room for storage is easy. Combine functionality by adding a personal mail slot to team lockers as a space-saving technique. Create small groups of lockers or group together in a traditional style.

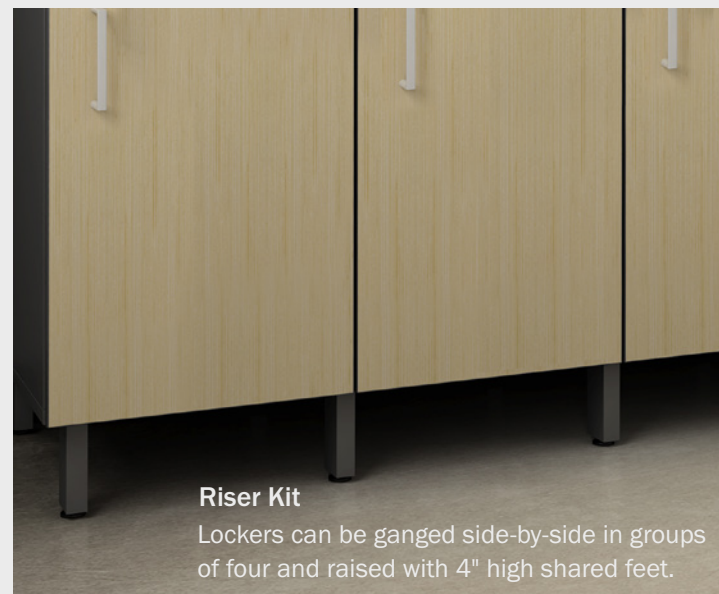

Lockers come standard with name plate frame (not shown)

Lockers ship with hardware to gang together side-by-side

Each compartment is keyed seperately. Optional digital combination lock available

Doors may be hinged left or right

Riser Kit
Lockers can be ganged side-by-side in groups of four and raised with 4" high shared feet.

- Bar
- Jota (Black)
- Jota (Silver)

Everything at hand

Keep document binders, warrants and files accessible and close to hand with lateral storage.

Work Islands

A multi-functional addition to any control room. Incorporate the components that work for the needs of your team, from lockers to recycle centers.

Get Organized.

A place for everything, and everything in its place.
