

Etched Acrylic

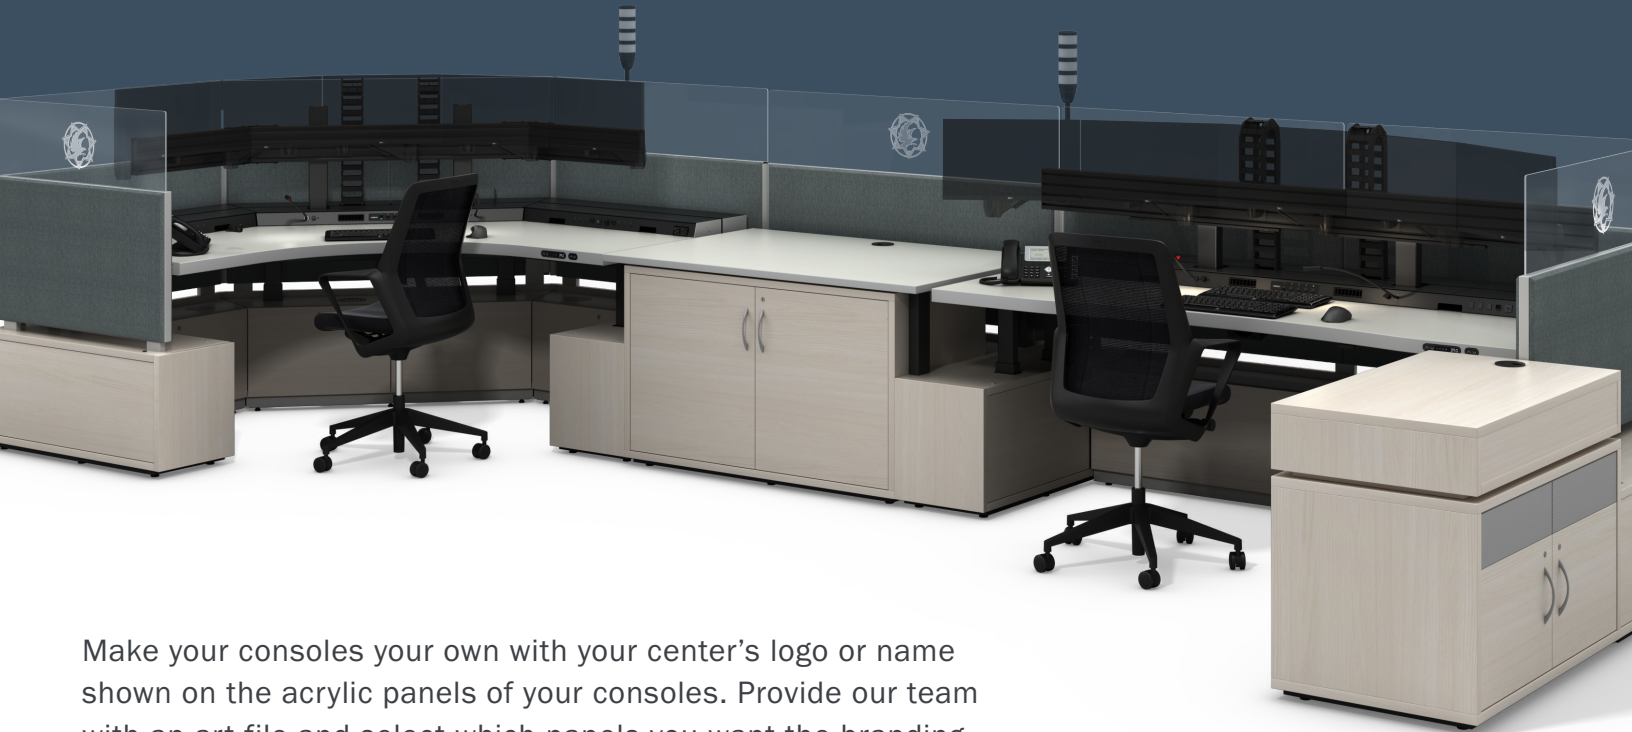

Enhance your environment

watsonconsoles

Elevate your center

Incorporate branded acrylic on your Mercury Consoles. Every acrylic panel has the option to be etched to create a cohesive environment throughout your center.

Make your consoles your own with your center's logo or name shown on the acrylic panels of your consoles. Provide our team with an art file and select which panels you want the branding displayed on, and we will take it from there.

Standard Options

Acrylic panels have the option to be etched in two standard placements centered to the panel. Vector artwork can be placed in a proportional 8"x8" area (A) or 8"x16" area (B).
